AutoCAD License Key [Win/Mac]

Configure the license key by going to the Autodesk Connections. Mapping Shapefile to Autocad File -> Open Select an existing folder: Enter a folder name in the "Folder name" input field. Note: File Manager will add the existing folder if it does not already exist. Enter a name to use when importing the file. Select the original file from the file manager: (If the selected file is a shapefile, File Manager will prompt you to select the file format you want to import. The options you have are: AutoCAD, ESRI Shapefile, ESRI TOPO, or DXF) Select "Create" to import the file. NOTE: Only a single feature from a shapefile can be imported at a time. Mapping Autocad to Shapefile Open Autocad and connect to your mapping server. Open the Shapefile Manager: Drag a shapefile into the "shapefiles" folder. A new item is added to the right pane. Click the "Install" button to install the shapefile on the server. Click "Save" to save the shapefile and return to Autocad. Enter the location where you want to save the shapefile: (This location must already exist on the server) Click "Save" to store the shapefile. A new item is added to the right pane. Drag a shapefile into the "shapefiles" folder on your local disk. The new item is added to the right pane. Install the installed shapefile. Drag the shapefile into the right pane of the shapefile manager. A new item is added to the right pane. Click the "Install" button to install the shapefile. Drag the installed shapefile into the "shapefiles" folder on the local disk. Configure the license key in Autocad Select "Commands" -> "Licenses" -> "Add License" -> "Add License" Select an Autocad license: Select one of the following licenses. To change the license type, click the drop-down arrow. Click the "Install" button. NOTE: If you are already in the command window when you install a license, the installation is added to the same command window.

What's New in the?

Markup import: Import via a simple drag and drop mechanism and insert the text as a graphic element in the drawing. (video: 0:46 min.) Markup assist: Connect dots, connect shapes and lines ("connectors"). This tool allows to quickly update a drawing with any number of geometric components. Connecting shapes and lines can be done manually, but the tool can also create all connections automatically and connect multiple points. The more points you have, the faster the process. Manage your parts: Use a new dialog to manage your parts automatically and quickly. You can set a drawing property on the part before adding it to the drawing. Then, the part is automatically assigned a unique ID and remains part of the drawing. Part Quality and Graphics Controls: These new controls in AutoCAD can help you to manage your file more efficiently. Command line The command line is more user friendly: one command for a single task. New commands available. Layer creation and management: Change the layout of your drawing by creating and managing new layers. Create new layers from groups and organizations, either within the drawing or in a separate drawing. Modify surface modeling: Add, delete, modify, and move components of surface models. The latest Surface Modeling dialog box makes it easier to use surface modeling by enabling you to run many commands from the main command line. New tools for drafting Drafting menu: Drafting commands are organized in a new menu that is more logical and easier to use. Drafting tool: Add and modify parts, connect lines and curves, group curves, join curves, and create splines. Drafting workspace: Configure the drafting workspace to work better for you. The new options help you create your own drawing style and layout. Drafting tab: Add and modify part properties, objects, paths, and coordinates. Design History: The new Design History tool lets you edit multiple versions of the same drawing in the drawing window. This is useful for merging version control in your projects. Drafting tool bars: You can now customize the main tool bar, add custom tool bars, and more. Select tool bars and command bars: You can quickly select the toolbars

System Requirements:

Minimum: OS: Windows XP SP3 with at least 512MB of RAM Processor: Intel Pentium-4 2.8GHz or higher Memory: 512MB Graphics: DirectX 9-capable video card DirectX: Version 9.0c Hard Drive: 1GB available space Sound: DirectX 9.0c Additional Notes: 7.3MB install Recommended: OS: Windows Vista or Windows 7 Processor: Intel Core 2 Quad CPU Memory: 1GB
