Elden Ring Cracked Accounts (RPG) - Game Features - New Fantasy Action RPG - Single Player - Steam - Overview Story When the desert kingdom of Tarnia is invaded by the powerful Elden Throne, the great army of the Holy Kingdom is wiped out, and the Empire is left with only a few scattered remnants. The Kingdom of Illikon has now been reduced to rubble. All the remnants of the population, once so mighty and proud, have scattered throughout the desolate and hostile lands. But the remaining survivors of the Elden Throne — the Elden Ring — have finally discovered a way to manipulate the consciousness of those left behind. Through a "diminishing spell" that goes beyond simple illusion, they have managed to alter the memories of a few key people of the scattered populations and created an illusion that imbues the power of the Throne. They have also made contact with the summoner Kilika, from the country of Vildur, and they intend to search for a means to restore the Elden Throne that lies in the far north of Imlah, the kingdom of Illikon. But they have no real knowledge of the reality of those who will be summoned, and they have no control over the miniscule amount of energy they have. The powers of the Throne, and the existence of their summoner, are still waiting for the players of the Ritual Tarnia to solve and unlock the mystery. What's new:

While many video games recently have begun to leave such things behind, I'm happy to see an influential game choose this path and take such steps to set itself apart as something that can cater to more casual play. I'd like to see more games make a similar move, not only in terms of the LFG community but also in general, because these kinds of communities (in many genres) can do a lot for game communities.

So, games in the works? At this point I don't know. But I do know that I'll be keeping an eye on this development and following their progress closely.
