Zittergie Coin Catalog [Latest 2022]

Zittergie is a coin catalog that allows you to create extensive coin catalogs and manage your collections. It's multi-lingual and can create coin collections for multiple regions. Create coin catalogs and keep track of your collection! You get a quick overview of all of the different coins from one country, value for different grades, mintage, variations, metal, weight, edge, diameter, pictures. One of the top features is the possibility to add inventory. The inventory is just like in a normal shop. You can attach your items to the coins (most of the time to the edge) and you can add any special characteristics to them. You can mark them as used, damaged, missing, sold, etc. Then you can search for them in a catalog of all of your items. This allows you to keep track of all of your inventory. The catalog is split up in two sides: the left side is for coins and the right side is for items. The left side contains a list of coin values and/or coin modifiers, while the right side contains a list of items with images. The catalog can create multiple coin catalogs for multiple regions of the world. Of course you can also load coins and items from your inventory into other catalogs, attach coins to items, modify it and place coins on the catalog. There are a lot of additional features like the ability to add your own coordinates and edit item images, redirection to many other catalogs, ability to export data to Excel, etc. In the future I plan on adding more descriptions for different coins, images and item type. I hope you will enjoy using this catalog! Screenshots Zittergie Coin Catalog is a part of the Zittergie branch. Zittergie Coin Catalog Description: Zittergie is a coin catalog that allows you to create extensive coin catalogs and manage your collections. It's multi-lingual and can create coin collections for multiple regions. Create coin catalogs and keep track of your collection!
