and allows novice to expert user. It is the only NANO POS (Point Of Sale) software which runs under Windows 2000 and later and supports POS features like scanning, printing, registration, inventory, barcode, receipt and transaction and POS designing.Q: Javascript from another function is not able to access app.property I have a function that modifies an object, then calls a different function. I'm not sure why the functions in the different functions don't have access to the other objects. function load coords() { $app.objects[4] = \{ 'x': app.x, 'y': app.y \}; app.x = 0; app.y \}$ = 0; app.objects.show = function(coord) { console.log(coord.x); } } Then I call the load_coords() function from another function app.objects.show({ 'x': 20, 'y': 30 }); I get the error: Uncaught TypeError: Cannot read property'show' of undefined I'm not sure why. Is there some way to make the app.objects.show(coord) function a parameter?
