Visual SlideShow Torrent Download is a handy program that enables individuals to make slideshows with a number of transition effects and publish them on the Internet. With a pretty straightforward interface, this software application enables any type of user to work with it, regardless of their previous experience. All the important actions are presented with the help of shortcut buttons and there is a panel in which you can add an unlimited number of pictures, with file formats such as BMP, DIB, JPG, JPEG, GIF, WMF, PNG and ICO. The pictures can be uploaded to the program with the help of the “Add images” button or the “drag and drop” feature. The latter is an option that enables you to manage files and create slideshows with a lot more ease. You should also know that you can import pictures from Flickr or Photobucket, by simply inputting the URL. The program enables you to sort the images in ascending or descending order according to the caption, date, file name or size, as well as rotate uploaded images and change their position. From the settings panel, the user can add MP3 files, input the title of the slide presentation, and show the controller or captions. In addition to that, people can choose a built-in template for the frame, control the image size and quality, and set up the transition effect. The resulted slideshow can be inserted into an already existing HTML page, exported to a Joomla module, or saved to a local folder or via FTP. To sum up, Visual SlideShow is a useful piece of software that can help you create slide presentations and publish them in different ways. There are a lot of transitions, frames and formats supported, features that make it efficient.]]> Desktop Wallpaper Locker 15 Dec 2013 13:37:55 +0000 Free Desktop Wallpaper Locker today, thanks to this Free and Simple application, you will be able to display your favorite photos as wallpapers on your desktop. System Requirements For Visual SlideShow:

- Two-Way Audio - Sufficient System Specs - To Experience The Best Audio Quality System requirements are not met by all video cards. For best performance we recommend 2 gigabytes (GB) or more of system RAM. Video card display requirements are listed below: - HD TV - Display resolution of 1280x1024 Using a lower resolution TV, results in lower quality and harder to see subtitles. If the video card does not have sufficient video memory for the display resolution, the video quality will also be lower.
