In its latest release, Adobe has introduced a new feature set that should demonstrate to users that getting the new features and performance improvements for their current and future applications is worth the upgrade. Although Adobe didn't precisely state whether this update would be its last for PS, or even if it plans to continue enlarging the suite, the company did indicate that its 10.3 release will be the last planned release of the mere 6 month-old product. There has been a great deal of fanfare and hoopla surrounding Photoshop today, much of it built upon the recent fixes that were released on Thursday evening. I uses the gimp, but it is really a drag and a half. Finding the right tool, getting the settings right, waiting for everything to load, etc have led me to believe that the Gimp would never do what photoshop does. The interface is so slow, i would rather use photoshop, because it is a n art program, and quite frankly i dont trust it to do anything. If you see an image you like on the web, but not prints, you can easily create that exact image with photoshop. Even with the time constraints of the Model Aquarium, either Photoshop or Gimp could scoop up some salmon.
